# We obtain the required data from the image material

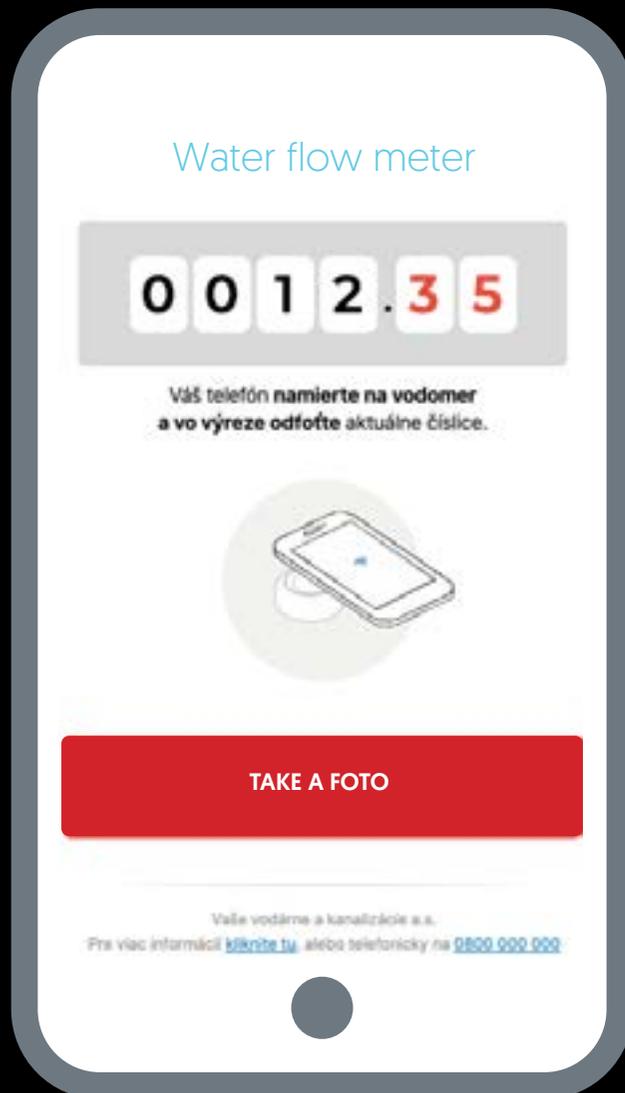

**We offer a unique technology of assisted self-deductions for performing deductions once a year or extraordinary deductions without installed remote reading devices.**

It has been proven that addressing customers via interactive SMS has significantly higher levels of return [Response Rate] than common forms of communication, e.g., by email. The fact that the customer is not forced to install any application makes the whole process simpler, faster and allows you to reach a wider group of customers. At the same time, this technology makes it possible to obtain the required information from the customer.

- ☑ **High reading accuracy using artificial intelligence**
- ☑ **There is no need to download any application to your mobile phone**
- ☑ **Customer-friendly solution**
- ☑ **Easy integration with any ERP / accounting software, scanning station, or email**

# We obtain the required data from the image material

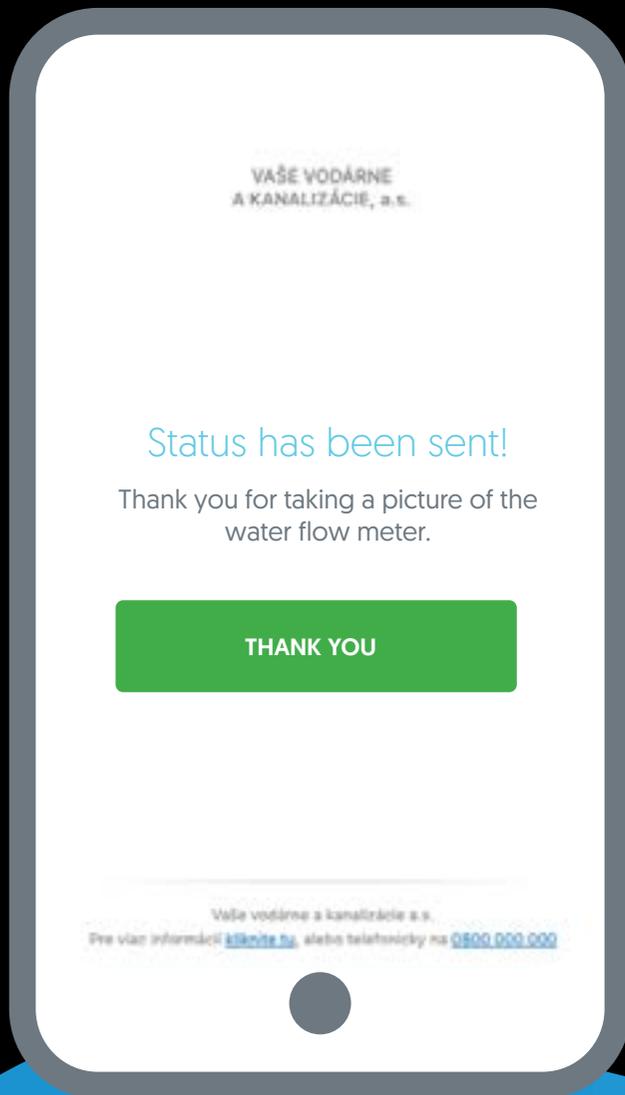

Unique links are generated on the supplier's side to address customers and for each collection point. These are sent via the SMS gateway in the form of a standard SMS, while it is also possible to use the SMS gateway of the customer [water company].

For a greater degree of security, the collection points can be replaced by another unique identifier on the customer's side. Thus, the supplier cannot identify a specific person or place, which also ensures compliance with the GDPR Regulation.

After receiving the SMS and clicking on the link in it, the customer is shown interactive content, through which he can take a photo of the water flow meter and manually enter the status on the water flow meter. This data is sent to the supplier's server, where it is subjected to inspection and then the customer is provided with a database containing the status of the water meter at the given collection point.

# Real photo processing

# Benefits of our solution

- ✓ Reaching a lot of customers quickly, easily, and cheaply
- ✓ High Response Rate
- ✓ No application download
- ✓ High reading accuracy with artificial intelligence and manual customer control
- ✓ Deduction with a photo taken, eligible in the event of a dispute
- ✓ Customer comfortable solution [I deduct when I can, I do not have to be at home, nobody comes to me]

## Solution as a service

In case of interest, MindFind can also be provided as a service without the need for investment in the solution.
